Access	D1.3.3(d)
Moisture	E3.3.3 E3.3.5 E3.3.6
Safety of Users	F2.3.1
Services & Facilities	G3.3.2(b) G6.3.1 G6.3.2 – not tested

Contributions to Compliance

Clause B - Stability

B2.3.1: Building elements must, with only normal maintenance, continue to satisfy the performance requirements of this code for the lesser of the specified intended life of the building, if stated, or:

(c) 5 years if:

- (i) The building elements (including services, linings, renewable protective coatings, and fixtures) are easy to access and replace, and
- (ii) Failure of those building elements to comply with the building code would be easily detected during normal use of the building

Clause C – Prevention of fire

C3.4(b): floor surface materials in the following areas of *buildings* must meet the performance criteria specified below:

Clause D – Access

D1.3.3(d): have *adequate* slip-resistant walking surfaces under all conditions of normal use,

Clause E – Moisture

E3.3.3: Floor surfaces of any space containing sanitary fixtures or sanitary appliances must be impervious and easily cleaned.

E3.3.5: Surfaces of building elements likely to be splashed or become contaminated in the course of the intended use of the building, must be impervious and easily cleaned.

E3.3.6: Surfaces of building elements likely to be splashed must be constructed in a way that prevents water splash from penetrating behind linings or into concealed spaces.

Clause F – Safety of Users

F2.3.1 The quantities of gas, liquid, radiation or solid particles emitted by materials used in the construction of buildings, shall not give rise to harmful concentrations at the surface of the material where the material is exposed, or in the atmosphere of any space.

Clause G – Services and Facilities

G3.3.2(b) All building elements constructed with materials which are free from hazardous substances which could cause contamination to the building contents

G6.3.1 The Sound Transmission Class of walls, floors and ceilings, shall be no less than 55.

G6.3.2 The Impact Insulation Class of floors shall be no less than 55.
